Rotterdam Netherlands 2006
# Table of contents

**Preface** XIII

**Image Processing and Data Fusion**

Road identification and refinement on multispectral imagery based on angular texture signature 3

*Q. Zhang & I. Couloigner*

Analysis of geostatistical parameters for texture classification of satellite images 11

*M. Durrieu, L.A. Ruiz & A. Balaguer*

Study of methods based on wavelets for texture classification of high resolution images 19

*A. Fdez-Sarría, L.A. Ruiz & J.A. Recio*

Fuzzy segmentation for wetland mapping: Incorporation of semivariogram texture 29

*W.-Y. Chiu & I. Couloigner*

Edge preserving phase unwrapping using graph cuts 39

*G. Valadão & J.M. Bioucas-Dias*

Filtering of InSAR interferograms 47

*M. Ouarzeddine, A. Belhadj-Aïssa, M. Rebihi & F. Tabarout*

Implementation of new methods of speckle noise reduction in SAR images 53

*L. Bouchemakh, Y. Smara, M. Benali & Z. Ben Cheikh*

SAR change detection techniques and applications 63

*R.J. Dekker*

MODIS and Landsat TM image fusion using the SIFuLAP method for mapping the Brazilian savannas (Cerrado) 71

Comparison of fusion methods for Quickbird images 81

*V. Meenakshisundaram & I. Couloigner*

MTF-tailored multi-resolution analysis for fusion multi-spectral and panchromatic images 87

*B. Aiazzi, L. Alparone, S. Baronti, A. Garzelli, F. Nencini & M. Selva*

The curvelet transform for fusion of very-high resolution multi-spectral and panchromatic images 95

*L. Alparone, S. Baronti, A. Garzelli & F. Nencini*

Objective determination of the degradation level of the multispectral and panchromatic images for fusion by means of the à trous algorithm 103

*M. Lillo Saavedra & C. Gonzalo Martin*
Physical Processes and Atmosphere

Retrieving aerosol optical thickness from a MODIS dataset for the Lisbon Metropolitan Area using a contrast reduction method
N.C. dos Santos Grosso

Validation of satellite longwave emission and net radiation with in-situ measurements during BUBBLE
G. Rigo, E. Parlow & D. Oesch

Influence of atmospheric correction on determination of lake water quality parameters based on CHRIS/PROBA images
K. Ostinska-Skotak

Satellite estimation of surface/atmosphere parameters: A sensitivity study
A. Prieto-Blanco, P.R.J. North, N. Fox & M.J. Barnsley

Mapping the aerodynamic roughness length using SAR images
S. Bidaud, T. Ranchin & L. Wald

Aggregation of the thermo-optical properties for a rugged heterogeneous surface in the infrared domain: A multiscale model
S. Pallotta, X. Briottet, C. Miesch & Y. Kerr

Polarimetric response for target characterization
B. Souissi, M. Ouarzeddine & A. Belhadj-Aissa

The cooling effect of cities in a hot and dry environment
C.M. Frey, G. Rigo & E. Parlow

Perturbation in global precipitation from multi-temporal remote sensing
L.N. Vasiliev

Geological Hazards

SAR interferometry: Detecting small landslides in the area of Northern Bohemia
I. Čapková & J. Kianička

Detection of hazardous gas leakage from pipelines using anomalous spectral reflectance features of vegetation
F. van der Meer, M. van der Meijde, J. Kooistra, H. van der Werff & M. Noomen

Remote sensing and geophysical survey in site investigations for special waste disposal: Case study Trgovska Gora (Croatia)
M. Oluić, S. Romandić & A. Schaller

Analyses of earthquake induced damage in urban area by means of remotely sensed data
S. Kaya, E. Saroglu & N. Musaoglu

Quantitative assessment and calibration of ASTER and SRTM DEMs for morphometric and geo-hazard analyses: Test case of Mauna Kea volcanic cones
M. Kervyn, R. Goossens & G.G.J. Ernst

Urban subsidence seen by DInSAR: Temporal deformation series derived from a least-squared technique
E. Simonetto, D. Raucoules, C. Carnec, P. Thierry, C. Lembezat & C. King

Environmental Applications

A proposal for a landscape integrated classification
A. Patrono & A. Saldana

Modelling of settlements-dynamics by object-oriented image and change detection analysis on Tenerife
S. Naumann & A. Siegmund
Modelling patterns of mosquito density based on remote sensing images

Possibilities of lake water quality monitoring based on CHRIS/PROBA superspectral data
K. Osiońska-Skotak, M. Kruk & M. Mróz 259

Minimum dataset for risk management of water pollution caused by olive oil factories in Crete
C.G. Karydas, I. Manakos, I. Sarakiotis & T. Sekuloska 267

Monitoring and modeling of the snow cover dynamic in Southern Germany - Capabilities of optical and microwave remote sensing
F. Appel, H. Bach, A. Loew, R. Ludwig & W. Mauser 277

Spaceborne observation and modeling of erosion and non-point source pollution in agricultural catchments draining into lakes
A. Lavoie, J. Deslandes, I. Beaudin, A. Michaud, F. Bonn & R. Fournier 287

Combining agricultural economic and hydrological models with the aid of remote sensing data
C. Montzka, H. Bogena, M. Canty, R. Kunkel & F. Wendland 299

Microwave radiometric remote sensing for emergency mapping of areas with water seepage through levees and of zones with dangerously high groundwater level

Remote sensing and GIS for water district management: The Caia network case study
P.A. Oliveira, A.M.M. Perdigão, J. Rocha & P. Morgado 315

EO-HYDRO: An Earth Observation Service for Hydropower Plant Management

Assessing large scale erosion susceptibility by combining remote sensing data and fuzzy logic modelling. Application to the Syros Island, Cycladic Archipelagos, Greece
C. Weber, A. Puissant, N. Evelpidou & J. Lobry 329

Vegetation indices - tools for the development evaluation in reclaimed areas
L. Halounová, P. Junek & J. Petruchová 339

Data acquisition field network for land state monitoring
G. Georgiev, D. Petkov & H. Nikolov 347

Agriculture, Forests and Vegetation

A remote sensing survey of vegetation communities adjacent to Myall Lakes, NSW, Australia
J. Yagiie & P. Garcia 355

Burned area mapping in Africa with SPOT-VEGETATION imagery: Accuracy assessment with Landsat ETM+ data, influence of spatial pattern and vegetation type
J.M.N. Silva & J.M.C. Pereira 367

The use of multi-temporal MODIS data for burnt area detection in the Italian peninsula through a classification tree approach
M. Trombetti, G. Amatulli & R. Lasaponara 377

Retrieval of crop biomass and soil moisture from ASAR/ENVISAT data
S. Paloscia, G. Macelloni, P. Pampaloni, S. Pettinato & E. Santi 385

Synthetic Aperture Radar for tropical savanna inventory and vegetation height retrieval
I.D. Cameron, K.M. Viergever, E.D. Wallington, I.H. Woodhouse, D. Moss & N. Stuart 391

Global Developments in Environmental Earth Observation from Space, Marcal (ed.) VII
Agricultural ground-level spectral modeling in support of remotely sensed data interpretation
R. Kancheva & D. Borisova

Implementation and control of the Good Agricultural and Environmental Conditions within the CwRS programme in Hungary

Assessment of forest degradation by means of remotely sensed data
N. Musaoglu, E. Saroglu, F. Bektas, C. Goksel & S. Kaya

Hyperspectral-based characterization of different vegetation species in Sundiken Mountain, Turkey
M. Çetin, N. Musaoglu, N. Çelik & M.D. Kantarci

Land Use and Land Cover

The evaluation of usability of VHR satellite images for land cover/land use identification in agricultural landscape

High resolution mapping land cover classification of the Elmali water basin
F. Bektas Balcik, E. Saroglu, C. Goksel & N. Musaoglu

Land use classification of ASTER image - Legionowo test site
S. Lewiński

Validation of the European CORINE Land Cover 2000 database
G. Maucha & G. Büttner

Accuracy assessment of the Portuguese CORINE Land Cover map
M. Caetano, F. Mata & S. Freire

Comparing land cover products CLC2000 and MOD12Q1 for Portugal
M. Caetano & A. Araújo

Land use classification in Spain using MERIS images
S. García Gigorro, F. González Alonso, S. Merino de Miguel, A. Roldán Zamarrón & J.M. Cuevas

Land use/cover maps by RS and ancillary data integration in a GIS environment
J. Rocha, J. A. Tenedório, S. Encarnação & P.M. Sousa

Great Lisbon Metropolitan Area land use/cover characterization through multi temporal and multi resolution VIS components analysis
J.A. Tenedório, J. Rocha, S. Encarnação & R. Estanqueiro

Analysing and mapping of Bozcaada Island land cover by means of remote sensing and GIS integration
F. Bektas Balcik & C. Goksel

Spectral mixture analysis of land covers
D. Borisova, R. Kancheva & H. Nikolov

Land cover classification with Support Vector Machine applied to MODIS imagery
P. Gonçalves, H. Carrão, A. Pinheiro & M. Caetano

Comparative evaluation of MIVIS and Hyperion hyperspectral data (0.4-2.4 µm) on the Pollino National Park (Italy)
R. M. Cavalli, L. Fusilli, S. Pascucci, S. Pignatti & M. Poscolieri
Urban and High Resolution Data

Sub-pixel mapping: A comparison of techniques
K.C. Mertens, L.P.C. Verbeke & R.R. De Wulf

Sub-pixel mapping of impervious surfaces from Landsat ETM+ data using reference proportions derived from VHR data
T. Van de Voorde, W. De Genst & F. Canters

Change detection in urban areas using Very High spatial Resolution satellite images. Case study in Brussels: Locating main changes in order to update the Urban Information System
E. Frauman & E. Wolff

The usefulness of VHR images for public administrations in an urban hilly region
M. Binard, Y. Cornet & J.-P. Donnay

Evaluation of high and Very High Resolution images for remote sensing control of area-based subsidies and Land Parcel Identification System in Hungary

Analysis of geometric accuracy of Landsat 5 TM and IRS 1D data by means of DGPS and map data
E. Saroglu, S. Kaya & C. Ormeci

Use of QuickBird satellite data for natural, semi-natural and urban environments
L. Rossi & F. Volpe

World Heritage and Archaeology

Estimation of the permafrost area in the Altai Mountains (Russia) in the framework of the preservation of the Frozen Tombs of the Altai Mountains
R. Goossens, W. Gheyle, J. Bourgeois & A. De Wulf

Hyperspectral monitoring of coral reefs. A case study: Fordate, Tanimbar, Indonesia

3D modeling and visualization of Cultural Heritage Sites from High-Resolution Satellite Imagery
A. Gruen, F. Remondino & L. Zhang

Study of the relations of the ancient communities with landscape in the South and West sides of the Sevan Lake area (Armenia)
N. Parmegiani & M. Poscolieri

QuickBird-based analyses for archaeological investigations
R. Lasaponara & N. Masini

3D Remote Sensing

Comparative analysis of space image orientation
K. Jacobsen

Potential of KOMPSAT-1 for mapping purposes
G. Bıyıklısalıh, H. Akcin, A. Marangoz & K. Jacobsen

Quality checking of DEM derived from satellite data (SPOT and SRTM)
S. Kay, P. Spruyt, R. Zielinski, P. Winkler, S. Mihály & G. Ivan

DEM and orthoimage generation from ASTER L1B images for remote areas
R. Tapia & R. Goossens

High resolution 3D-mapping of urban air pollution using EO data
N. Sifakis, C. Iosifidis & D. Sarigiannis

Global Developments in Environmental Earth Observation from Space, Marcal (ed.) IX
Satellite observations of bio-optical indicators related to dinoflagellates blooms in selected Mediterranean coastal regions
V. Barale, M. Masó, M. Vila, A. Lugliè, N. Sechi & M.G. Giacobbe

MOSES (Measuring system for the observation of sea surfaces): Lagrangian drift experiments in the East Frisian Wadden Sea
O. Puncken, T. Badewien & R. Reuter

Analysis of the mean sea level and its trend in the Iberian Atlantic and the Mediterranean Sea from altimeter data and the PSMSL data base
M. Arias, P. Villares, N. Castro, J.J. Alonso & M. Catalán

The retracking of ocean parameters in the Mediterranean Sea and the surrounding area of the Iberian Atlantic using RA-2 Envisat data
J. Gómez-Enri, C.P. Gommenginger, M.A. Srokosz, P.G. Challenor, P. Villares & J. Alonso

Pollution signature of water quality using remote sensing data
B. Lounis & A. Belhadj-Aïssa

Use of airborne LIDAR for research in fisheries oceanography
V. Zabavnikov & A. Lisovsky

Algae diagnostics by matrix method of laser fluorimetry
V.V. Fadeev, E.E. Ostroumov & R. Reuter

Research of dissolved organic matter fluorescence band variability in the South Atlantic using artificial neural networks
i.A. Burikov, T.A. Dolenko, V.V. Fadeev & I.I. Vlasov

Mapping coastal aquaculture and fisheries structures by satellite imaging radar. Case study of the Lingayen Gulf, the Philippines
C. Travaglia, G. Profeti, J. Aguilar-Manjarrez & N. Lopez

Satellite radar imagery of the coastal zone: Slicks and oil spills
O. Lavrova, T. Bocharova & A. Kostianoy

Investigation of structural properties of marine surface film manifestations on SAR images
D.V. Darkin, L.M. Mitnik & VA. Dubina

Radar backscattering at sea surface covered with oil films
M. Miyagina & A. Churumov

Envisat ASAR polarization experiment in Peter the Great Bay, Japan Sea: Preliminary results
L.M. Mitnik, VA. Dubina & O.G. Konstantinov

Quantification of the total suspended matter concentration in the sea breaking zone from in situ measurements and remotely sensed data - two empirical approaches
A.C. Teodoro, A.R.S. Marçal & F. Veloso Gomes

Analysis of the Portuguese west coast morphology and morphodynamics, based on aerial images and GIS tools
J. Pais Barbosa, F. Veloso Gomes & F. Taveira Pinto

Intertidal beach morphodynamics from Argus video images
S. Quartel & E.A. Addink

A Landsat TM and ETM+ survey of quaternary coastal landforms in the central coast of NSW, Australia
J. Yagiie & P. Garcia

Mapping shallow, benthic communities using hyperspectral, remotely sensed data: A test of habitat classification using multiple sources of bathymetry
P. Gagnon, W. Jones & R. Scheibling
Assessment of land-cover changes related to shrimp farming in two districts of northern Vietnam using multitemporal Landsat data
T.T.H. Pham, M. Bélard, F. Bonn, K. Goïta, J.-M. Dubois & V.C. Pham

A multispectral remote sensing analysis of Danube delta and North-Western coastal zone of Black Sea
M. Zoran & L.F. Zoran

Observing and mapping the coastline relief in the Romanian sector of the Black Sea using satellite images
V. Loghin & G. Murătoaneanu

Using of the aircraft laboratory “Arktika” for research in the Barents Sea coastal zone
V. Zabavnikov & A. Lisovsky
